

International Festival “Youth of the Planet”

Dear Sir/ Madam,

Let me introduce the **International Festival “Youth of the Planet”**, St Petersburg, Russia.

On the basis of **cultural/educational exchange** we are interested in inviting you to participate in contests/ events which are organized under this festival by the International Cultural Center “Planet of Festivals” with the support of the Committee for Culture and St Petersburg City Administration.

We already collaborate with many European countries as France, Italy, Norway, Switzerland, England, Finland etc. and we are looking for new contacts and new possibilities of cooperation.

The main intention of our festival is international exchange between Russia and other countries of the world which gives a great chance for young and talented people to take part in international programs and exchange experience and cultures.

The age groups of our participants are the following:

- schoolchildren- up to 16 years old
- college students- from 16 till 19
- students- from 18 till 30

Different youth and children bands and singers of all sorts of art genres (**choreographic, vocal, instrumental, choir and folklore**) can take part in our festivals. We also organize international master classes.

If your School or Academy holds different events or festivals and you want to invite art groups from Russia as well we would be happy to take part in them. We try our best to attract talented Russian youth and children bands and singers to take part in our international projects.

If you have your own preferences you are welcome to write us about them. We are interested in different projects or events and are always open to new ideas.

We are looking forward to collaborate with you!

Best regards,

Elena Dorzh
International Coordinator
